Summary

Full-stack JavaScript developer focused on React.js frontend development with growing MERN stack expertise. Experienced in building responsive web applications, API integrations, and modern UI systems. Also has research exposure in deep learning and explainable AI for medical image analysis.

Education

University of Kashmir – SHMM Govt. Degree College Anantnag

Aug 2022 – Jul 2026

B.Sc Computer Applications (Honours with Research)

CGPA: 8.0 / 10

Relevant Coursework:

Machine Learning, Artificial Intelligence, Data Structures (C), Design & Analysis of Algorithms, DBMS, Operating Systems, Computer Networks, Probability & Statistics, Discrete Mathematics, Computing Mathematics, OOP with C++, Python Programming, Java Programming, Computer Organization & Architecture, Cybersecurity, IoT Fundamentals, Android Programming, Theory of Computation, Web Designing (HTML/CSS/JS), Digital Electronics, Research Methodology

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend (Learning): Node.js, Express.js, MongoDB, REST APIs

Languages: JavaScript, Python, C, C++

AI/ML: CNNs, Grad-CAM, Explainable AI

Tools: Git, GitHub, Vite, VS Code

Projects

Adaptive Fused Grad-CAM for OCT Retinal Disease Analysis (Research Project)

AI/ML

- Built a TensorFlow/Keras ResNet50 model for OCT disease classification (CNV, DME, DRUSEN, NORMAL)
- Developed multi-layer Adaptive Fused Grad-CAM for improved explainability across feature levels
- Implemented confidence-retention testing using masked heatmap evaluation
- Performed SSIM-based structural similarity analysis for medical image validation
- Built React-based UI for visualization of predictions and interpretability outputs

AxisWardrobe – Fashion E-Commerce Frontend

React.js

- Built responsive React + Vite e-commerce frontend with Tailwind CSS
- Implemented product browsing, search, filtering, cart, and wishlist features
- Added authentication UI flow (login/signup screens)
- Used localStorage for persistent state management

Recipe Assistant – Recipe Discovery Web App

React + API

- Built recipe search platform using TheMealDB API
- Implemented favorites system and modal-based recipe views
- Designed responsive UI with dark mode support
- Deployed on GitHub Pages and Vercel
